

CSC-496/696: Natural Language Processing and Text as Data

Lecture 2: Python Review, Part I

Friday, August 30, 2024

Python Review

- Because many students may not have seen Python before, we'll spend the next few classes reviewing Python
- One of the best guides on Python comes from Python itself:
<https://docs.python.org/3/tutorial/index.html>
- Most of these classes will be entirely lab, meaning we'll go through code on Google Colab
- The class website ([AU-NLPTaD-F24.github.io](https://github.com/AU-NLPTaD-F24)) contains a link to the Google Colab file we'll use for today's lab

Few Housekeeping Notes

- I will not be holding office hours next Thursday
 - You can use my Calendly link to sign up to meet if needed
- Assignment 1 will be released today. In the last 10 minutes of class, I'll show you how it works.
 - Please let me know if you cannot access the file
- Please complete the class survey if you haven't yet
